

Westview Retirement Community Residents enjoyed a trip to Lake McConaughy and Lake Ogallala via the mini bus in a “Get out of town” outing. It was a gorgeous, still fall evening.

We viewed the Morning Glory that lets the water into the penstock tube that leads to the generator. The water then shoots into the air to aerate it for the fish habitat in Lake Ogallala below. The evening was finished by eating supper at the “Sands Edge” north of the lake.
