

City officials are providing a roll off dumpster for disposing of non-hazardous goods at the grass clipping collection site west of the ball field.

White goods and metal may be taken to a site located at First and Hancock Streets (up on the hill).

The dumpster is being offered in conjunction with the community clean-up project.

West Central Nebraska Development District (WCNDD) is the designated Nuisance Officer for this project and is conducting independent assessments in the community to identify properties that may require clean-up.

Items that will be looked at include unlicensed vehicles (including trailers), auto parts, white goods, dead trees, trash and refuse.

City officials advise that the roll off dumpster is available for Grant residents only.
