

Plan to attend the April 4 Imperial Tree Care Workshop. The past years of drought have hurt many trees in southwest Nebraska. UNL Extension and Nebraska Forest Service are sponsoring a tree care workshop where participants can get answers to questions on tree problems and care.

The free tree care workshop begins at 9 a.m. MT time at the Lied Library, Imperial. Topics that will be covered include:

- Tree Selection for SW Nebraska: choosing drought tolerant, sustainable trees
- Proper tree planting
- Pruning tree basics
- Hands-on tree pruning at the CCS arboretum

In case of inclement weather, all sessions will be at the library. For information call the Chase County Extension office at 308-882-4731.
