

Dear Editor:

This is in regard to a safety issue. This past week on two occasions I have been to the fairgrounds activity building in the evening hours and it is DARK.

There is only one light and that is on the west side. However, there is no light on the east side. The sidewalk is not lit up.

My concern is for safety, I am concerned that someone will fall.

Is there a reason why there is not much lighting in the area? Should this not be a priority?

Thank you.

Deborah Pick
