

Want to keep a career in logistics moving at a quick pace? Mid-Plains Community College offers an accelerated path to earning a logistics certificate in just 10 months.

The logistics field includes industries providing transportation of passengers and cargo, warehousing and storage of goods, scenic and sightseeing transportation, and support activities related to such modes of transportation as air, rail, water, road and pipeline.

Individuals who begin classes in August will be on track to earn a logistics certificate in May 2012. Classes in MPCC's logistics certificate program include: Introduction to Logistics; Transportation Logistics; Supply Chain Management; Global Logistics; and Purchasing Logistics.

"I am so excited to be able to offer the logistics program at MPCC," said Jean Condon, business/office technology instructor. "With the many logistic resources such as the railroad, interstate highways, agriculture, and distribution centers we have available in our area this makes a great fit for us to provide education in logistics. This is an opportunity for people to learn more about the many components that make up logistics."

For more information about the logistic certificate or other MPCC course offerings, call (308) 535-3609 or (800) 658-4308 ext. 3609 or visit the college's website at www.mpcc.edu.
